

**YOU CAN HAVE CRITICAL INFORMATION IN 5 MINUTES
INSTALL AN ACCSENSE SYSTEM TODAY**

Accsense System:

1. Sensor Pods - measure temperature, light, noise, and door openings and automatically form a secure, self-healing wireless-mesh network.

2. Wireless Gateway - connects the sensor network to the Internet or direct access for integration into custom software.

3. On-line account - for monitoring, storing, alarming and analyzing data.

A BETTER SOLUTION FOR MEDICAL & LAB MONITORING

WIRELESS SOLUTIONS FOR

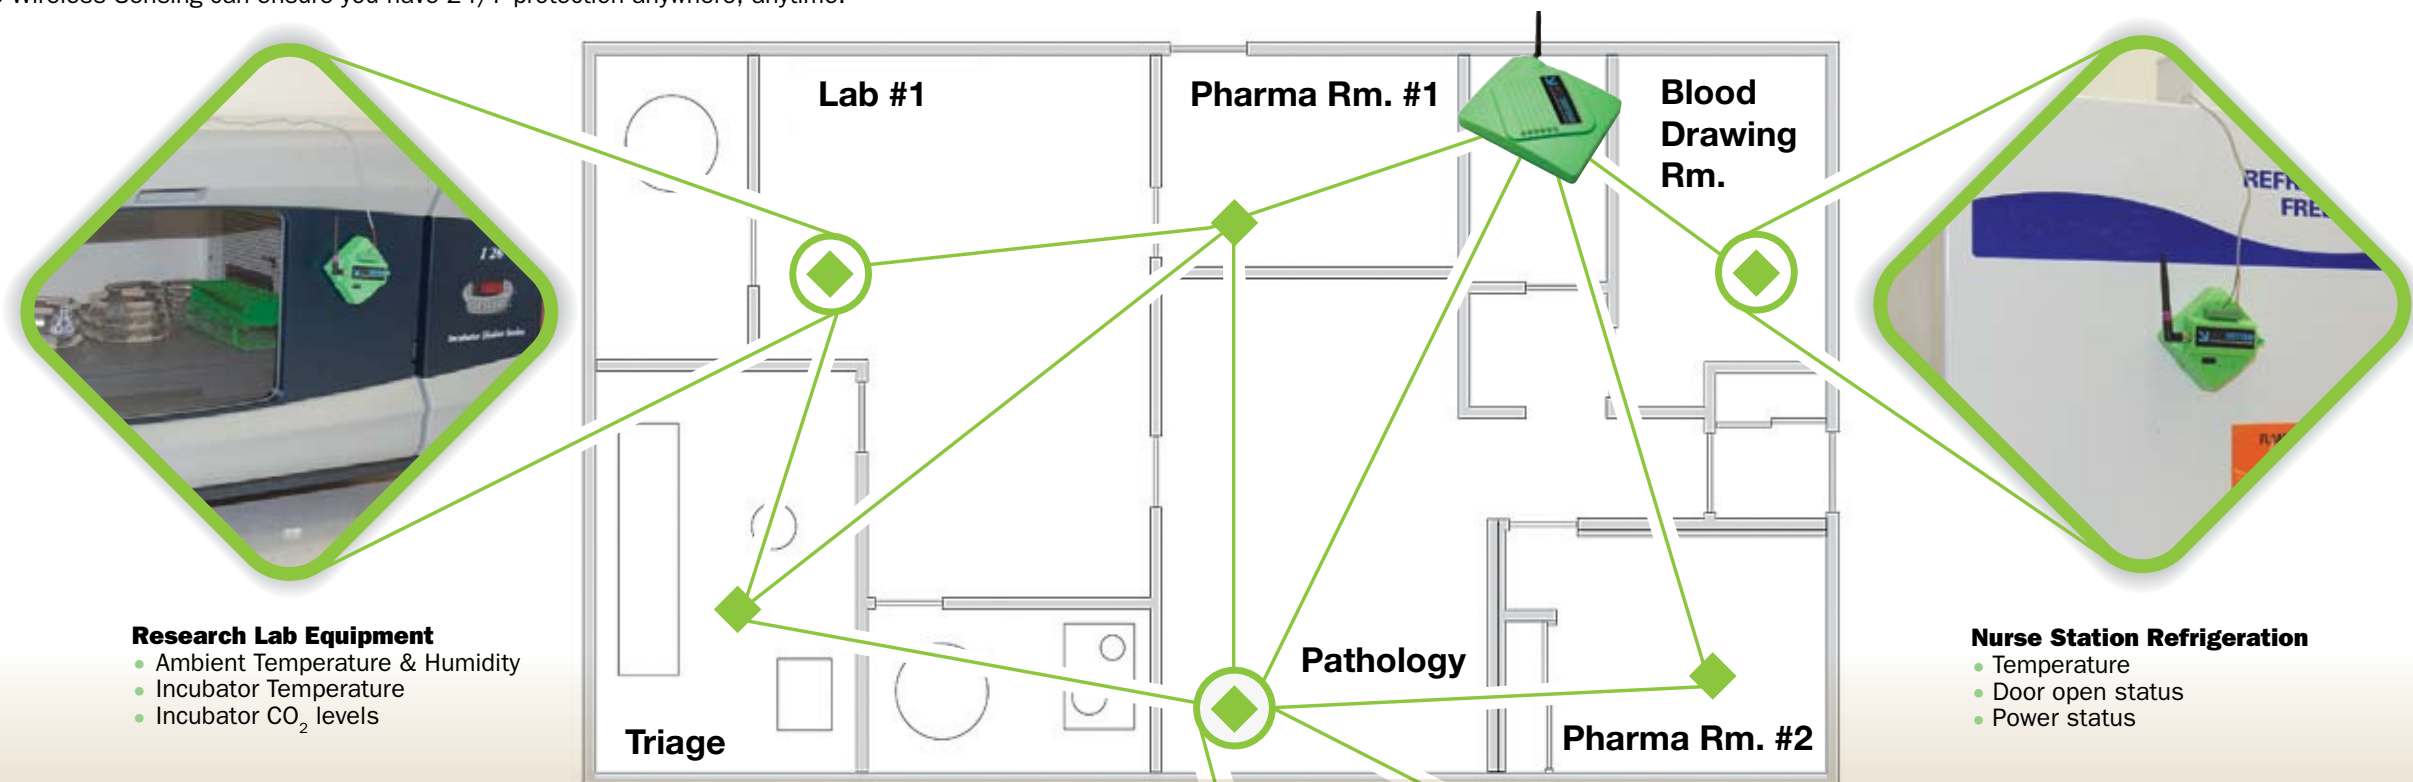

**MEDICAL
AND LAB**

MONITORING

IMMEDIATELY COMPLY WITH JCAHO, FDA, GxP & OTHER INDUSTRY STANDARDS

Monitor laboratories, hospitals, pharmaceutical refrigeration, incubation, and facilities. Accsense Wireless Sensing can ensure you have 24/7 protection anywhere, anytime.

- Research Lab Equipment**
- Ambient Temperature & Humidity
 - Incubator Temperature
 - Incubator CO₂ levels

- Nurse Station Refrigeration**
- Temperature
 - Door open status
 - Power status

for refrigeration monitoring.

Accsense Fast & Easy Wireless Sensing allows you to Monitor:

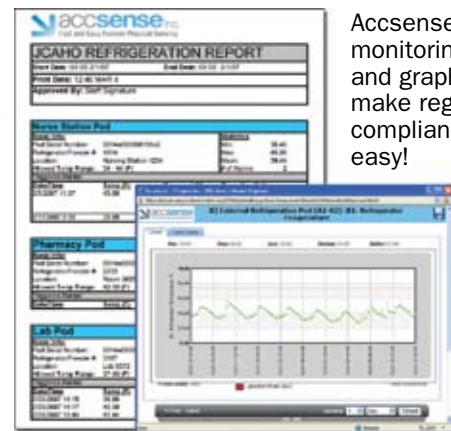

- Temperature / Humidity
- Cryogenic Freezers & Refrigerators
- HVAC
- Dry Contacts
- 4-20mA
- 0-10V
- and more!

Alarm Notifications - Peace of Mind

Ensure your valuable assets are always safe. Accsense Fast & Easy Remote Sensing is a fully functional alarming system. If a temperature goes out of range, staff is immediately notified by telephone, email, page or text message. Log into the online account from any PC to investigate the situation or to issue a corrective action.

Advantages of Continuous Monitoring:

Continuous monitoring means you can sleep better because your Accsense System is watching – all the time. Stop wasting time with manual logs or worrying about frozen samples. Know that your Accsense system will notify you immediately of any anomalies.

Accsense real-time monitoring, charts and graphs make regulatory compliance reports easy!

Accsense Web Services = No IT Department

Let us do the IT work for you. Simply log onto your Accsense Web account, create graphs, generate reports and set up alarm notifications in five minutes. You have the control.

Cryogenic Storage Room

- -80°C freezer temperature
- Liquid Nitrogen freezer temperature
- Liquid Nitrogen supply level & pressure

Accsense Wireless Mesh

The Accsense solution uses a self-configuring mesh network, providing fast setup. The mesh allows Pods to communicate with each other, sending your data to the Gateway and to your Online Account. The result: better transmission reliability and extended range. A mesh may be formed with up to 16 Pods connecting to one Gateway.

Comply With Regulations

Accsense quickly assists with regulatory compliance in your lab or hospital application. Meet your JHACO, FDA, AABB and other regulations and standards immediately. We can also help organizations where FDA CFR 21 Part 11 is important.

Calibrated & Safe

Feel confident and know that your data is safe and reliable. Accsense equipment can ship fully accredited, calibrated equipment, or can be set up for a simple self calibration performed by you or your own lab/consultant.
